

**EXTREEMA®**

**XS**

Get to know **EXTREEMA® HMPE XS** round slings.

The extra thin **WLL 3T**, **WLL 5T** & **WLL 10T** Extreema® round slings make it possible to lift heavy payloads when working with limited spaces.

### **The Extra Thin Round Sling**

With a tiny diameter and a D:d ratio of 1:1, it enables working with standard classic model bow shackles instead of more expensive wide-body shackles and lifts on the pin. Moreover, it is possible to equip the sling with different protections. The slings are available in various colours and very short effective working lengths (0,3m - 20m).

## “XS: Small & Smart”

### One size fits all

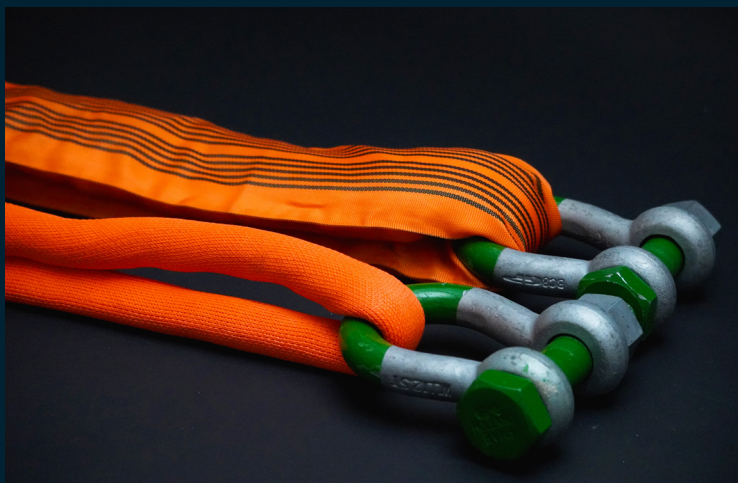

By making use of the WLL 3T (6T basket), WLL 5T (10T basket) and WLL 10T (20T basket) Extreema® slings, you can discard all polyester slings from 1T up to 20T. Using the XS saves storage, logistics, purchasing and disposal costs while supplying employees with a more efficient and faster workflow.

### Sustainability

The Extreema® XS round slings positively contribute to sustainability by diminishing industrial waste. Their extended lifespan significantly reduces pollution and environmental impact, making them an eco-friendly choice.

### Features

- ✓ Saving costs
- ✓ D:d ratio of 1:1
- ✓ Environmental friendly
- ✓ Less storage
- ✓ Improving workflow
- ✓ Light in weight
- ✓ Long life cycle
- ✓ Flexible
- ✓ Safer lifting operations
